\*As a percentage of average daily NAV for the quarter valued at Php 309,640,770.93.

**INVESTMENT OBJECTIVE AND STRATEGY**

Intends to achieve for its participants long-term capital growth via investments primarily in Philippine equities listed in the Philippine Stock Exchange. The Fund aims to surpass its benchmark (gross of fees) which is the Philippine Stock Exchange Index (PSEi).

**CLIENT SUITABILITY**

- A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.
- The AB CAPITAL EQUITY FUND is suitable for individual and corporate investors who are at least classified as aggressive based on their risk profile and who seek potentially higher returns through stock market investments but are also aware of the possibility of capital losses that such investments may entail.
- In order to minimize risks and maximize returns, the participants are recommended to stay invested in the Fund for more than three (3) years.

**KEY RISKS AND RISK MANAGEMENT**

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

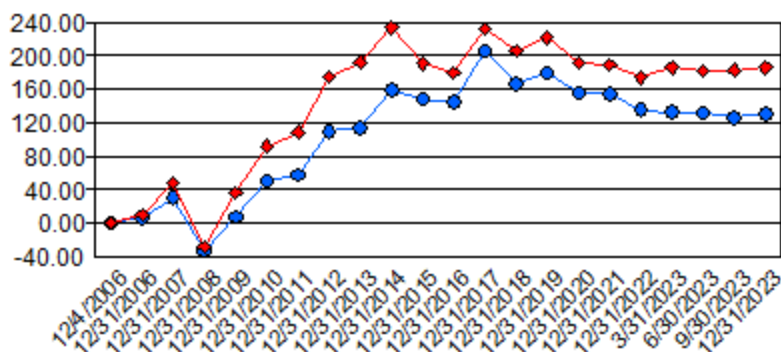

<b>Interest Rate Risk</b>	Possibility for an investor to experience losses due to the changes in interest rate. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
<b>Market/Price Risk</b>	This is the possibility for an investor to experience losses due to the changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations. It is the risk of the UITF to lose value due to a decline in securities prices, which may sometimes happen rapidly or unpredictably. The value of investments fluctuate over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, etc. As a result, the Net Asset Value per Unit (NAVPU) may increase to make profit or decrease to incur loss.
<b>Liquidity Risk</b>	This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market. Liquidity risk occurs when certain securities in the UITF portfolio may be difficult or impossible to sell at a particular time which may prevent the redemption of investment in UITF until assets can be converted to cash.
<b>Credit/Default Risk</b>	Possibility for an investor to experience losses due to borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. Inability of the borrower to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk on a counterparty (a party the UITF Fund Manager trades with) defaulting on a contract to deliver its obligation either in cash or securities. This is the risk of losing value in the UITF portfolio in the event the borrower defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade. This decline in the value of the UITF happens because the default/failure would make the price of the security go down and may make the security difficult to sell. As these happen, the UITF's NAVPU will be affected by a decline in value.

**\* THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP. (PDIC).**  
**\* RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY.**  
**\* WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.**  
**\* THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**

## OUTLOOK AND STRATEGY

### Stock Market

Local equities eked out a modest gain of 2.0% in the fourth quarter of 2023 amid turbulent trading which pulled down the index below the 6,000 level in late October, only to rally to 6,450 by year-end.

The weakness in local equities was initially brought about by hawkish rhetoric from central banks which culminated with the Bangko Sentral ng Pilipinas (BSP) delivering an off-cycle hike that brought the policy rate to 6.50%. Domestic inflation remained outside of the BSP's target as rice prices continued to surge. Investors also remained anxious on the geopolitical front due to the conflict in the Middle East.

However, market sentiment improved after the third quarter GDP printed at 5.9%, bucking an expected slowdown that pinned down estimates to only 4.7%. Meanwhile, in the US, the Federal Reserve had adopted a more cautious tone regarding further policy tightening. Bond markets reacted favorably as investors anticipated that interest rates had already peaked. The spillover effect on risk assets such as equities eventually lifted the local index into positive territory for the quarter.

### AB Capital Equity Fund Performance

The AB Capital Equity Fund posted an increase of 1.25% in the fourth quarter of 2023. The Net Asset Value Per Unit (NAVPU) increased to 2.8623 as of December 31, 2023, from 2.8268 as of September 30, 2023.

### Equity Fund Strategy

The Fund increased allocation to equities in anticipation of a sustained rally given the attractive valuations of local stocks and the expected uplift from lower interest rates. The Fund remains highly selective in positioning and has focused allocation in companies with clear competitive advantages, high earnings quality, and attractive valuations as these companies may benefit the most from the improving market conditions.

## LIST OF PROSPECTIVE INVESTMENTS

Pursuant to the foregoing objectives, the Fund may be invested and reinvested in:

- a) Listed and soon to be listed (Initial Public Offering) common stocks, preferred stocks, and securities convertible into or exchangeable to common stocks;
- b) Fixed-income securities issued by the government and corporations such as but not limited to, commercial papers, promissory notes, bonds, non-convertible preferred shares exchange-traded fixed income securities, collective investment plans of the trustee/other trustees and other marketable securities that are traded in an organized exchange market;
- c) Other investments allowed under regulations issued by the BSP.

The combined exposure of the Fund to any entity and its related parties shall not exceed fifteen percent (15%) of the market value of the Fund. Provided, that Fund investments, partially or substantially, in exchange traded equity securities shall be subject to the fifteen percent (15%) exposure limit.
