*As a percentage of average daily NAV for the quarter valued at Php 1,168,028,324.20.

INVESTMENT OBJECTIVE AND STRATEGY

The Fund Intends to achieve for its participants long-term capital growth and income by investing in a diversified portfolio of high-grade marketable securities allocated in fixed income and equity securities listed in the Philippine Stock Exchange. The allocation for equity securities shall be between 40% to 60% of the portfolio or any other allocation range that may be prescribed by the Trust Association of the Philippines (TOAP) in consultation with the regulatory authorities. The Fund aims to surpass its composite benchmark of 60% Bloomberg Philippine Sovereign Bond Index 1 to 5 Year (BPHIL15) and 40% Philippine Stock Exchange Index (PSEi).

BPHIL15 is a market value weighted index based on PHP government bond issuances of the Bureau of Treasury. Its qualified constituents are securities with at least one year of maturity, but not longer than five years. For additional information on benchmark construction, please contact Bloomberg.

The PSEI is the main index of the Philippine Stock Exchange. It is used to measure the performance of equity securities that represent the Philippine stock market. The Bloomberg and the PSE Website provide additional information on the benchmarks.

CLIENT SUITABILITY

- A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.
- The AB CAPITAL BALANCED FUND is suitable for individual and corporate investors who are at least classified as balanced based on their risk profile and who are aware of the opportunity for high yields that portfolios with stock market investments may provide but are also knowledgeable of the possibility of capital losses that such investments may entail.
- In order to minimize risks and maximize returns, the participants are recommended to stay invested in the Fund for more than three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk	Possibility for an investor to experience losses due to the changes in interest rate. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
Market/Price Risk	This is the possibility for an investor to experience losses due to the changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations. It is the risk of the UITF to lose value due to a decline in securities prices, which may sometimes happen rapidly or unpredictably. The value of investments fluctuate over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, etc. As a result, the Net Asset Value per Unit (NAVPU) may increase to make profit or decrease to incur loss.

Liquidity Risk	This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market. Liquidity risk occurs when certain securities in the UITF portfolio may be difficult or impossible to sell at a particular time which may prevent the redemption of investment in UITF until assets can be converted to cash. Even government securities which are the most liquid of fixed income securities may be subjected to liquidity risk particularly if a sizeable volume is involved.
Credit/Default Risk	Possibility for an investor to experience losses due to borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. Inability of the borrower to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk on a counterparty (a party the UITF Fund Manager trades with) defaulting on a contract to deliver its obligation either in cash or securities. This is the risk of losing value in the UITF portfolio in the event the borrower defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade. This decline in the value of the UITF happens because the default/failure would make the price of the security go down and may make the security difficult to sell. As these happen, the UITF's NAVPU will be affected by a decline in value.
<p>* THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP. (PDIC).</p> <p>* IT IS A TRUST PRODUCT AND IS NOT AN OBLIGATION OF THE TRUSTEE, ITS AFFILIATES AND SUBSIDIARIES.</p> <p>* RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY.</p> <p>* WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.</p> <p>* THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.</p> <p>* THE TRUSTOR MUST READ THE UITF'S DECLARATION OF TRUST, MAKE HIS/HER OWN RISK ASSESSMENT AND IF NEEDED, SEEK AN INDEPENDENT /PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.</p>

UNIVERSAL ROBINA CORPORATION	Common Shares	27.74

Investments in the said outlets were approved by the Trust Committee. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

OUTLOOK AND STRATEGY

Stock Market

The second quarter saw the PSEi rebound sharply from early lows as global trade tensions eased and domestic conditions improved. The quarter opened with heavy selling after Trump's sweeping tariffs rattled markets, though the Philippines' competitive 17% tariff led to outperformance compared to Asian peers. Benign inflation and a strong peso allowed the BSP to cut rates twice, while progress in U.S.-China and other trade talks lifted sentiment.

Foreign inflows returned, buoyed by robust bank earnings, consumer resilience, and the signing of the Capital Markets Efficiency Promotion Act, which slashed the stock transaction tax to 0.1%. Mid-quarter gains were briefly interrupted by U.S. credit downgrades, EU tariff threats, and political noise, before a U.S.-brokered ceasefire between Israel and Iran sparked a global rally. By quarter-end, the PSEi gained 3%, supported by easing inflation, a resilient currency, and an improved geopolitical backdrop.

Fixed-Income Market

Philippine government bonds delivered mixed performance in Q2 as the yield curve further steepened. Despite the BSP cutting its key rate by 50 bps to 5.25%, long-end yields climbed 20–30 bps, reflecting persistent term premium pressures. Inflation eased to a multi-year low of 1.2% (driven by declining oil and rice prices), though new U.S. tariffs under the Trump administration clouded the disinflation trajectory.

With both inflation and GDP below target, we anticipate further monetary easing to stimulate growth. Consequently, we retain our strategic overweight on duration.

AB Capital Balanced Fund Performance

The AB Capital Balanced Fund posted an increase of 4.22% in the second quarter of 2025. The Net Asset Value Per Unit (NAVPU) increased to 1.3747 as of June 30, 2025, from 1.3190 as of March 31, 2025.

Balanced Fund Strategy

Fixed income broadly underperformed despite supportive rate cuts and low inflation, validating our tactical underweight in the asset class.

The fund's equity sleeve delivered significant outperformance over the quarter due to superior stock selection.

For third quarter, we expect rate cuts to be gradual and data-dependent, with U.S. tariff risks posing the primary headwind to sentiment. We maintain our equity overweight, anticipating continued relative strength versus bonds.

LIST OF PROSPECTIVE INVESTMENTS

Pursuant to the foregoing objectives, the Fund may be invested and reinvested in:

- a) Listed and soon to be listed (Initial Public Offering) common stocks, preferred stocks, and securities convertible into or exchangeable to common stocks;
- b) Fixed-income securities issued by the government and corporations such as but not limited to, commercial papers, bonds, exchange-traded fixed income securities; and other marketable securities that are traded in an organized exchange or market; and
- c) Other investments allowed under regulations issued by the BSP. which are applicable to the Fund.

The combined exposure of the Fund to any entity and its related parties shall not exceed fifteen percent (15%) of the market value of the Fund. Provided, that Fund investments, partially or substantially, in exchange traded equity securities shall be subject to the fifteen percent (15%) exposure limit to single entity/issuer. This limit, however, shall not apply to non-risk assets as defined by the Bangko Sentral.

AB Capital is regulated by the Bangko Sentral ng Pilipinas (BSP).
