---	--	---

*As a percentage of average daily NAV for the quarter valued at Php 1,085,440,708.71.

INVESTMENT OBJECTIVE AND STRATEGY

The Fund Intends to achieve for its participants long-term capital growth and income by investing in a diversified portfolio of high-grade marketable securities allocated in fixed income and equity securities listed in the Philippine Stock Exchange. The allocation for equity securities shall be between 40% to 60% of the portfolio or any other allocation range that may be prescribed by the Trust Association of the Philippines (TOAP) in consultation with the regulatory authorities. The Fund aims to surpass its composite benchmark of 60% Bloomberg Philippine Sovereign Bond Index 1 to 5 Year (BPHIL15) and 40% Philippine Stock Exchange Index (PSEi).

BPHIL15 is a market value weighted index based on PHP government bond issuances of the Bureau of Treasury. Its qualified constituents are securities with at least one year of maturity, but not longer than five years. For additional information on benchmark construction, please contact Bloomberg.

The PSEI is the main index of the Philippine Stock Exchange. It is used to measure the performance of equity securities that represent the Philippine stock market. The Bloomberg and the PSE Website provide additional information on the benchmarks.

CLIENT SUITABILITY

- A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.
- The AB CAPITAL BALANCED FUND is suitable for individual and corporate investors who are at least classified as balanced based on their risk profile and who are aware of the opportunity for high yields that portfolios with stock market investments may provide but are also knowledgeable of the possibility of capital losses that such investments may entail.
- In order to minimize risks and maximize returns, the participants are recommended to stay invested in the Fund for more than three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk	Possibility for an investor to experience losses due to the changes in interest rate. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
Market/Price Risk	This is the possibility for an investor to experience losses due to the changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations. It is the risk of the UITF to lose value due to a decline in securities prices, which may sometimes happen rapidly or unpredictably. The value of investments fluctuate over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, etc. As a result, the Net Asset Value per Unit (NAVPU) may increase to make profit or decrease to incur loss.

Liquidity Risk	<p>This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market. Liquidity risk occurs when certain securities in the UITF portfolio may be difficult or impossible to sell at a particular time which may prevent the redemption of investment in UITF until assets can be converted to cash. Even government securities which are the most liquid of fixed income securities may be subjected to liquidity risk particularly if a sizeable volume is involved.</p>
Credit/Default Risk	<p>Possibility for an investor to experience losses due to borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. Inability of the borrower to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk on a counterparty (a party the UITF Fund Manager trades with) defaulting on a contract to deliver its obligation either in cash or securities. This is the risk of losing value in the UITF portfolio in the event the borrower defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade. This decline in the value of the UITF happens because the default/failure would make the price of the security go down and may make the security difficult to sell. As these happen, the UITF's NAVPU will be affected by a decline in value.</p>
<p> * THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP. (PDIC). * IT IS A TRUST PRODUCT AND IS NOT AN OBLIGATION OF THE TRUSTEE, ITS AFFILIATES AND SUBSIDIARIES. * RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY. * WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT. * THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE. * THE TRUSTOR MUST READ THE UITF'S DECLARATION OF TRUST, MAKE HIS/HER OWN RISK ASSESSMENT AND IF NEEDED, SEEK AN INDEPENDENT /PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT. </p>

UNIVERSAL ROBINA CORPORATION	Common Shares	19.85

Investments in the said outlets were approved by the Trust Committee. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

OUTLOOK AND STRATEGY

Balanced Fund

Stock Market

Pessimism from 2024 carried over into January for local equities which suffered its worst monthly decline at -10.2% in more than two years. A big miss for Philippine GDP in the fourth quarter weighed on stocks as household consumption still struggled against inflation. Capping off an already volatile month was the PSEi rebalancing which sent the index lower by 4.0% in the final trading day of the month.

February and March ushered in positive performance for local stocks as bargain hunting emerged, but these were not enough to offset the steep losses from January. Global markets were on edge as Pres. Trump sent a flurry of tariff threats, stalling any kind of meaningful recovery for local equities. The PSEi declined by 5.3% in the first quarter of 2025.

Fixed-Income Market

Philippine government bonds saw a mixed first quarter as the yield curve steepened, with short to medium term yields declining by 30 to 50 bps and long-term yields rising 10 to 20 bps. Interest rate cut expectations for the 1st half of the year have been reduced as the BSP opted to reduce the RRR (Reserve Ratio Requirement) instead.

On the data front, inflation fell to 1.8%, below the 2 to 4% target range of the BSP, as food & fuel prices continued to correct. Meanwhile GDP sharply missed expectations at 5.2% due to weaker than expected consumption figures. With the Philippines below its inflation and GDP targets, we see interest rate cuts to be necessary for the country. As a result, we maintain our overweight on duration.

AB Capital Balanced Fund Performance

The AB Capital Balanced Fund posted an increase of 1.38% in the first quarter of 2025. The Net Asset Value Per Unit (NAVPU) increased to 1.3190 as of March 31, 2025, from 1.3011 as of December 31, 2024.

Balanced Fund Strategy

Although the strategy maintained its overweight stance on equities by the end of the quarter, the fund has shifted tactical cash into fixed income as real interest rates hover at multi-year highs. We have also increased the fixed income portfolio's duration as a result.

We continue to emphasize highly active positioning in companies with clear competitive advantages, high earnings quality, and attractive valuations as these companies may benefit the most from the improving market conditions.

LIST OF PROSPECTIVE INVESTMENTS

Pursuant to the foregoing objectives, the Fund may be invested and reinvested in:

- a) Listed and soon to be listed (Initial Public Offering) common stocks, preferred stocks, and securities convertible into or exchangeable to common stocks;
- b) Fixed-income securities issued by the government and corporations such as but not limited to, commercial papers, bonds, exchange-traded fixed income securities; and other marketable securities that are traded in an organized exchange or market; and
- c) Other investments allowed under regulations issued by the BSP. which are applicable to the Fund.

The combined exposure of the Fund to any entity and its related parties shall not exceed fifteen percent (15%) of the market value of the Fund. Provided, that Fund investments, partially or substantially, in exchange traded equity securities shall be subject to the fifteen percent (15%) exposure limit to single entity/issuer. This limit, however, shall not apply to non-risk assets as defined by the Bangko Sentral.
