*As a percentage of average daily NAV for the quarter valued at Php 4,471,335,102.02.

INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims for capital preservation and income generation by investing in a diversified portfolio of fixed income instruments with a maximum portfolio duration of one (1) year.

The Fund aims to surpass its benchmark (gross of fees) equivalent to 3-month PHP BVAL reference rate (Bloomberg Code: BV3MRPTB). This benchmark is interpolated by the levels 3-month PHP government treasury bills trade using Bloomberg's proprietary model. The BV3MRPTB rate is then accrued daily to serve as the fund's benchmark on a net of tax basis (less 20% withholding tax).

BVAL is a Bloomberg Valuation benchmark reference rates as reported in the Bloomberg system. The risk profile of the fund's benchmark maybe viewed as conservative. Participants are advised that the fund may invest in securities with a remaining term to maturity of not more than three (3) years but with a weighted average portfolio life of one (1) year or less. Additional information on the benchmark may be obtained from Bloomberg or the Bureau of Treasury website.

**As of October 26, 2018, the Philippine Dealing & Exchange Corporation (PDEX) officially ceased performing the daily calculation and publication of the PDST Reference Rates. Effective October 29, 2018, the PHP BVAL Reference Rate have been used in lieu of the discontinued PDST Reference Rate. The Fund's plan rules have been amended accordingly to reflect this change and the appropriate advisory will be made upon the approval of such amendments. This change is not expected to have a material impact on the features and the performance of the Fund.*

CLIENT SUITABILITY

- A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.
- The AB CAPITAL SHORT TERM FUND is suitable for individual and corporate investors who are at least classified as moderate based on their risk profile and who are looking for investments with yields relatively higher than those of savings and time deposit accounts.
- In order to minimize risks and maximize returns, the participants are recommended to stay invested in the Fund for at least one (1) year.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk	Possibility for an investor to experience losses due to the changes in interest rate. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
Market/Price Risk	This is the possibility for an investor to experience losses due to the changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations. It is the risk of the UITF to lose value due to a decline in securities prices, which may sometimes happen rapidly or unpredictably. The value of investments fluctuate over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, etc. As a result, the Net Asset Value per Unit (NAVPU) may increase to make profit or decrease to incur loss.

Liquidity Risk	This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market. Liquidity risk occurs when certain securities in the UITF portfolio may be difficult or impossible to sell at a particular time which may prevent the redemption of investment in UITF until assets can be converted to cash. Even government securities which are the most liquid of fixed income securities may be subjected to liquidity risk particularly if a sizeable volume is involved.
Credit/Default Risk	Possibility for an investor to experience losses due to borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. Inability of the borrower to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk on a counterparty (a party the UITF Fund Manager trades with) defaulting on a contract to deliver its obligation either in cash or securities. This is the risk of losing value in the UITF portfolio in the event the borrower defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade. This decline in the value of the UITF happens because the default/failure would make the price of the security go down and may make the security difficult to sell. As these happen, the UITF's NAVPU will be affected by a decline in value.
<p>* THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP. (PDIC).</p> <p>* IT IS A TRUST PRODUCT AND IS NOT AN OBLIGATION OF THE TRUSTEE, ITS AFFILIATES AND SUBSIDIARIES.</p> <p>* RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY.</p> <p>* WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.</p> <p>* THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.</p> <p>* THE TRUSTOR MUST READ THE UITF'S DECLARATION OF TRUST, MAKE HIS/HER OWN RISK ASSESSMENT AND IF NEEDED, SEEK AN INDEPENDENT /PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.</p>

OUTLOOK AND STRATEGY

Short-Term Fund

Fixed-Income Market

Philippine government bonds saw a mixed first quarter as the yield curve steepened, with short to medium term yields declining by 30 to 50 bps and long-term yields rising 10 to 20 bps. Interest rate cut expectations for the 1st half of the year have been reduced as the BSP opted to reduce the RRR (Reserve Ratio Requirement) instead.

On the data front, inflation fell to 1.8%, below the 2 to 4% target range of the BSP, as food & fuel prices continued to correct. Meanwhile GDP sharply missed expectations at 5.2% due to weaker than expected consumption figures. With the Philippines below its inflation and GDP targets, we see interest rate cuts to be necessary for the country. As a result, we maintain our overweight on duration.

AB Capital Short-Term Fund Performance

The AB Capital Short-Term Fund posted a return of 1.13% in the first quarter of 2025. The Net Asset Value Per Unit (NAVPU) increased to 1.2820 as of March 31, 2025, from 1.2677 as of December 31, 2024.

Short-Term Fund Strategy

Due to the recent reduction in RRR by the BSP, short term yields have declined significantly for both BSP and Treasury bills. The fund aims to offset the lower rates by capital gains from trading longer duration securities.

LIST OF PROSPECTIVE INVESTMENTS

Pursuant to the foregoing objectives, the Fund may be invested and reinvested in:

- a) Investments allowed under regulations issued by the BSP which are applicable to the Fund;
- b) Fixed-income securities issued by the government of the Republic of the Philippines with maximum remaining maturities of one (1) year and are traded in an organized exchange or market;
- c) Deposits with local banks and branches of foreign banks operating in the Philippines.
- d) Securities issued or guaranteed by the Philippine government or by the BSP;
- e) Tradable securities issued by any supranational entity;
- f) Exchange-listed fixed income securities; and
- g) Such other tradable investment outlets/categories allowed for money market UITF's by the relevant regulations and determined by the Trustee's Trust Committee as suitable for the Fund.

The combined exposure of the Fund to any entity and its related parties shall not exceed fifteen percent (15%) of the market value of the Fund. Provided, that Fund investments, partially or substantially, in exchange traded fixed income securities shall be subject to the fifteen percent (15%) exposure limit to single entity/issue. This limit, however, shall not apply to non-risk assets as defined by the Bangko Sentral.
